Reviewer General Comments and Suggestions (mandatory written feedback):

The content of the abstract seems to be out of topic for this conference. The methodology of investigation and the results of the study have not been well presented (the text seems a program more than the result of a conducted study). Bibliographical references are missing.

Reviewer General Comments and Suggestions (mandatory written feedback): Although a very interesting proposal, regretfully this paper is mismatched for this design communication conference. We suggest you seek a more appropriate venue for your work. Perhaps a transportation planning conference. If the focus shifts towards graphical techniques and methods of interpreting and communicating transportation gridlock, perhaps the work will address the conference theme. Included graphics do not point to such strategies.
