**Reviewer General Comments and Suggestions (mandatory written feedback):**

The topic is interesting and pertinent to the conference theme. In the abstract the methodology and analytical procedure that allowed to get to results are not discussed in the text. References are completely missing. Anyhow, representations are significant and the contribution is of interest for the conference.

**Reviewer General Comments and Suggestions (mandatory written feedback):**

Paper is a description of a tool but there is no argument yett. It would be helpful to have a clear thesis or question. What is the context of digital imagery and what are applications? What are strengths and weaknesses of this tool? What are next steps?
