

**ABSTRACT/PAPER REVIEW FORM
2018 DCA CONFERENCE**

Abstract Number: 049

Abstract/Paper Title: The Impact of Auditory Disorder and Visual Disorder on Message Elaboration and Self-Regulation When Presented with Psychiatric Help-Seeking Information

Please mark the appropriate column and add mandatory written feedback below. The right hand column is for ranking by numeric number (1 being lowest and 10 being highest) for each row. Please add total.

	YES	Needs Work	NO	Please rank by a numeric number below for each row, 10 being highest 1 being lowest
1. Proposed abstract/paper addresses the conference theme or sub-themes	x			8
2. The content contains some original ideas and contributes to research, or teaching, or practice.	x			8
3. The purpose of the paper is stated clearly.	x			8
4. The paper is well organized and contains all the relevant sections.	x			8
5. The content shows evidence of sufficient background reading and state-of-the-art research and topic.	x			8
6. The research study methods are sound and appropriate.	x			8
7. The writing is clear, concise and interesting.	x			8
8. The references and quotations are clear. The bibliography is updated and relevant.	x			8
9. The conclusions or summary are accurate and supported by the content.	x			8
10. Proposed paper will likely be of interest to conference participants and attendees	x			8
Please Add Total Points from All Rows: 80				

Reviewer General Comments and Suggestions (mandatory written feedback):

The abstract is clear, and the topic is interesting and pertinent to the conference theme. The reliability of VE as a substitute of reality is not addressed. A broader description of the experimental setting is welcome in the full paper.

Reviewer Recommendation:

Please indicate which of the following actions you recommend.

1. **Recommended** (no significant changes suggested)

2. **Recommended with Reservation** (suggest changes to the manuscript as specified in this review)

3. **Not Recommended**

Reviewer General Comments and Suggestions (mandatory written feedback): topic could be interesting but text is very difficult to read. How do you define health risk? Title is also very difficult to understand. Maybe paper could address the rise in anxiety due to technology? Also why are transportation nodes the site of investigation?

Methodology is clear but topic is very dry.

Visual disorder could be more than trash cans. Perhaps visual disorder could be expanded – what creates visual disorder? How does this tool improve anxiety other than to measure it?

Reviewer General Comments and Suggestions (mandatory written feedback): Very interesting proposal. The research method itself is worth studying and perhaps the most intriguing to me. Whether virtual experiences are comparable enough to real life environments to draw controlled conclusions? Look forwards to the finished product.
