Reviewer General Comments and Suggestions (mandatory written feedback):
There are several papers that deal with rapid prototyping in design. This one seems to have a better handle on how to explore the implications of the process. The outcomes from the stated project are limited, but interesting. The abstract needs proofreading and editing before publication.

Reviewer General Comments and Suggestions (mandatory written feedback):
This was not a blind review. Author names were included in the abstract. This is a very detailed abstract where the intentions are clearly presented. The methods presented in the abstract seems very detailed especially for a single studio course. It would be interesting to see the outcomes of this study.
