Reviewer General Comments and Suggestions (mandatory written feedback):

This paper generally seems to follow the spirit of the conference theme. The abstract would be enhanced by sample graphic content.

Questions 4, 5, 6, 8 seem more appropriate to a formal paper than an abstract.

Reviewer General Comments and Suggestions (mandatory written feedback):

Visualization of dataset especially with sets that contain large inputs would be an interesting topic for the conference. The paper could be strengthened by the addition of references for energy data and methods for calculating energy sets, as well as an example of the graphic representation or means that will be employed as illustration of the methodology of integrating multiple medias with existing energy-use data. Defining the conference thematic might allow a understanding of the target trajectory of the paper,
