Reviewer General Comments and Suggestions (mandatory written feedback):
This paper generally seems to follow the spirit of the conference them The abstract illustrations are appropriate. The text has grammatical issues and needs editing.

Questions 4, 5, 6, 8 seem more appropriate to a formal paper than an abstract.

Reviewer General Comments and Suggestions (mandatory written feedback):
The topic of form generation through parametric analysis and simulation is important research avenue. The abstract would be strengthened with further explanation of the outcomes. The illustration provided implies a very simple outcome and one that is without uniqueness., The Use the outcome to separate the research from others. Or expand on the development of the algorithm and process.
