**Reviewer General Comments and Suggestions (mandatory written feedback):**

**Although this is an important topic, the paper did not address how design communication fits into the problems of excess water usage. Is the author proposing that graphics, or fliers or web applications could help to achieve the goal of reduced usage? While the author clearly states an important problem, they do not state what their specific proposal would be and how it fits into the theme of the conference.**

**Reviewer General Comments and Suggestions (mandatory written feedback):**

This abstract is vague and seemingly un-researched. . .an idea for study, yes, an abstract showing reading, research, conclusions, etc. - all of the things that are required in an abstract are missing.
